SCIRT is rebuilding the city’s earthquake damaged roads, water, wastewater and stormwater pipes.

Works update: Main Road, tree trimming

The seawall and Coastal Pathway will be built around the existing macrocarpa tree opposite the Mt Pleasant Road intersection along Main Road.

The lower branches of the tree need to be trimmed so they do not interfere with traffic and pedestrians on the road and the new pathway. This has approval from Christchurch City Council arborists. The tree will be trimmed early next year.
